ABOUT US

Founded in 2009, NeoScent International, was the first scent marketing company in Thailand. Since then, our expansion throughout Asia, Australia and the Middle East, has reinforced our reputation as #1.

PROFESSIONAL TEAM

Our multinational team of experts is comprised of people with diverse backgrounds. Their experience and work ethics, along with their passion for what we do, are what make NeoScent International, the best in the business.

SCENT CREATION & COMPOSITION

We provide businesses a way to break through the auditory and visual overload by using scent to reach their customers on an emotional level, strengthen their brand and increase their revenues.

We work with our clients to incorporate their scent into a multitude of facets of the customer experience. The more touch-points that incorporate the scent, the more the customer is exposed which strengthens the brand connection.

SYSTEM DESIGN

Having a great perfume is of little to no value if it cannot be dispensed properly to the desired space. After a thorough onsite survey, our design team uses the measurements, duct-work plans, floor-plans, air flow sensor readings and temperature levels to map an MCP (Machine Configuration Plan). This plan will include: which types and how many machines will be used, machine program settings and the locations of installation for each machine. This method allows us to save our customers money by using the least amount of equipment and perfume oil, yet still producing the desired results.

We have a range of equipment which can suit any size space; from a 50m³ restroom to an entire airport or casino. The machine shown above can scent up to 3,000m³ and multiple units can be installed into one AHU or FCU.

Our engineers will design a perfect system for your location, no matter how big or small.

INSTALLATION

The ability to correctly position and install scenting equipment is central to the successful deployment of a scenting solution. We have supplied and installed over a thousand aroma difusers in 15 different countries, and as a result, our instalation team has the necessary experience and technical knowledge to do the job right.

PROFESSIONAL TEAM

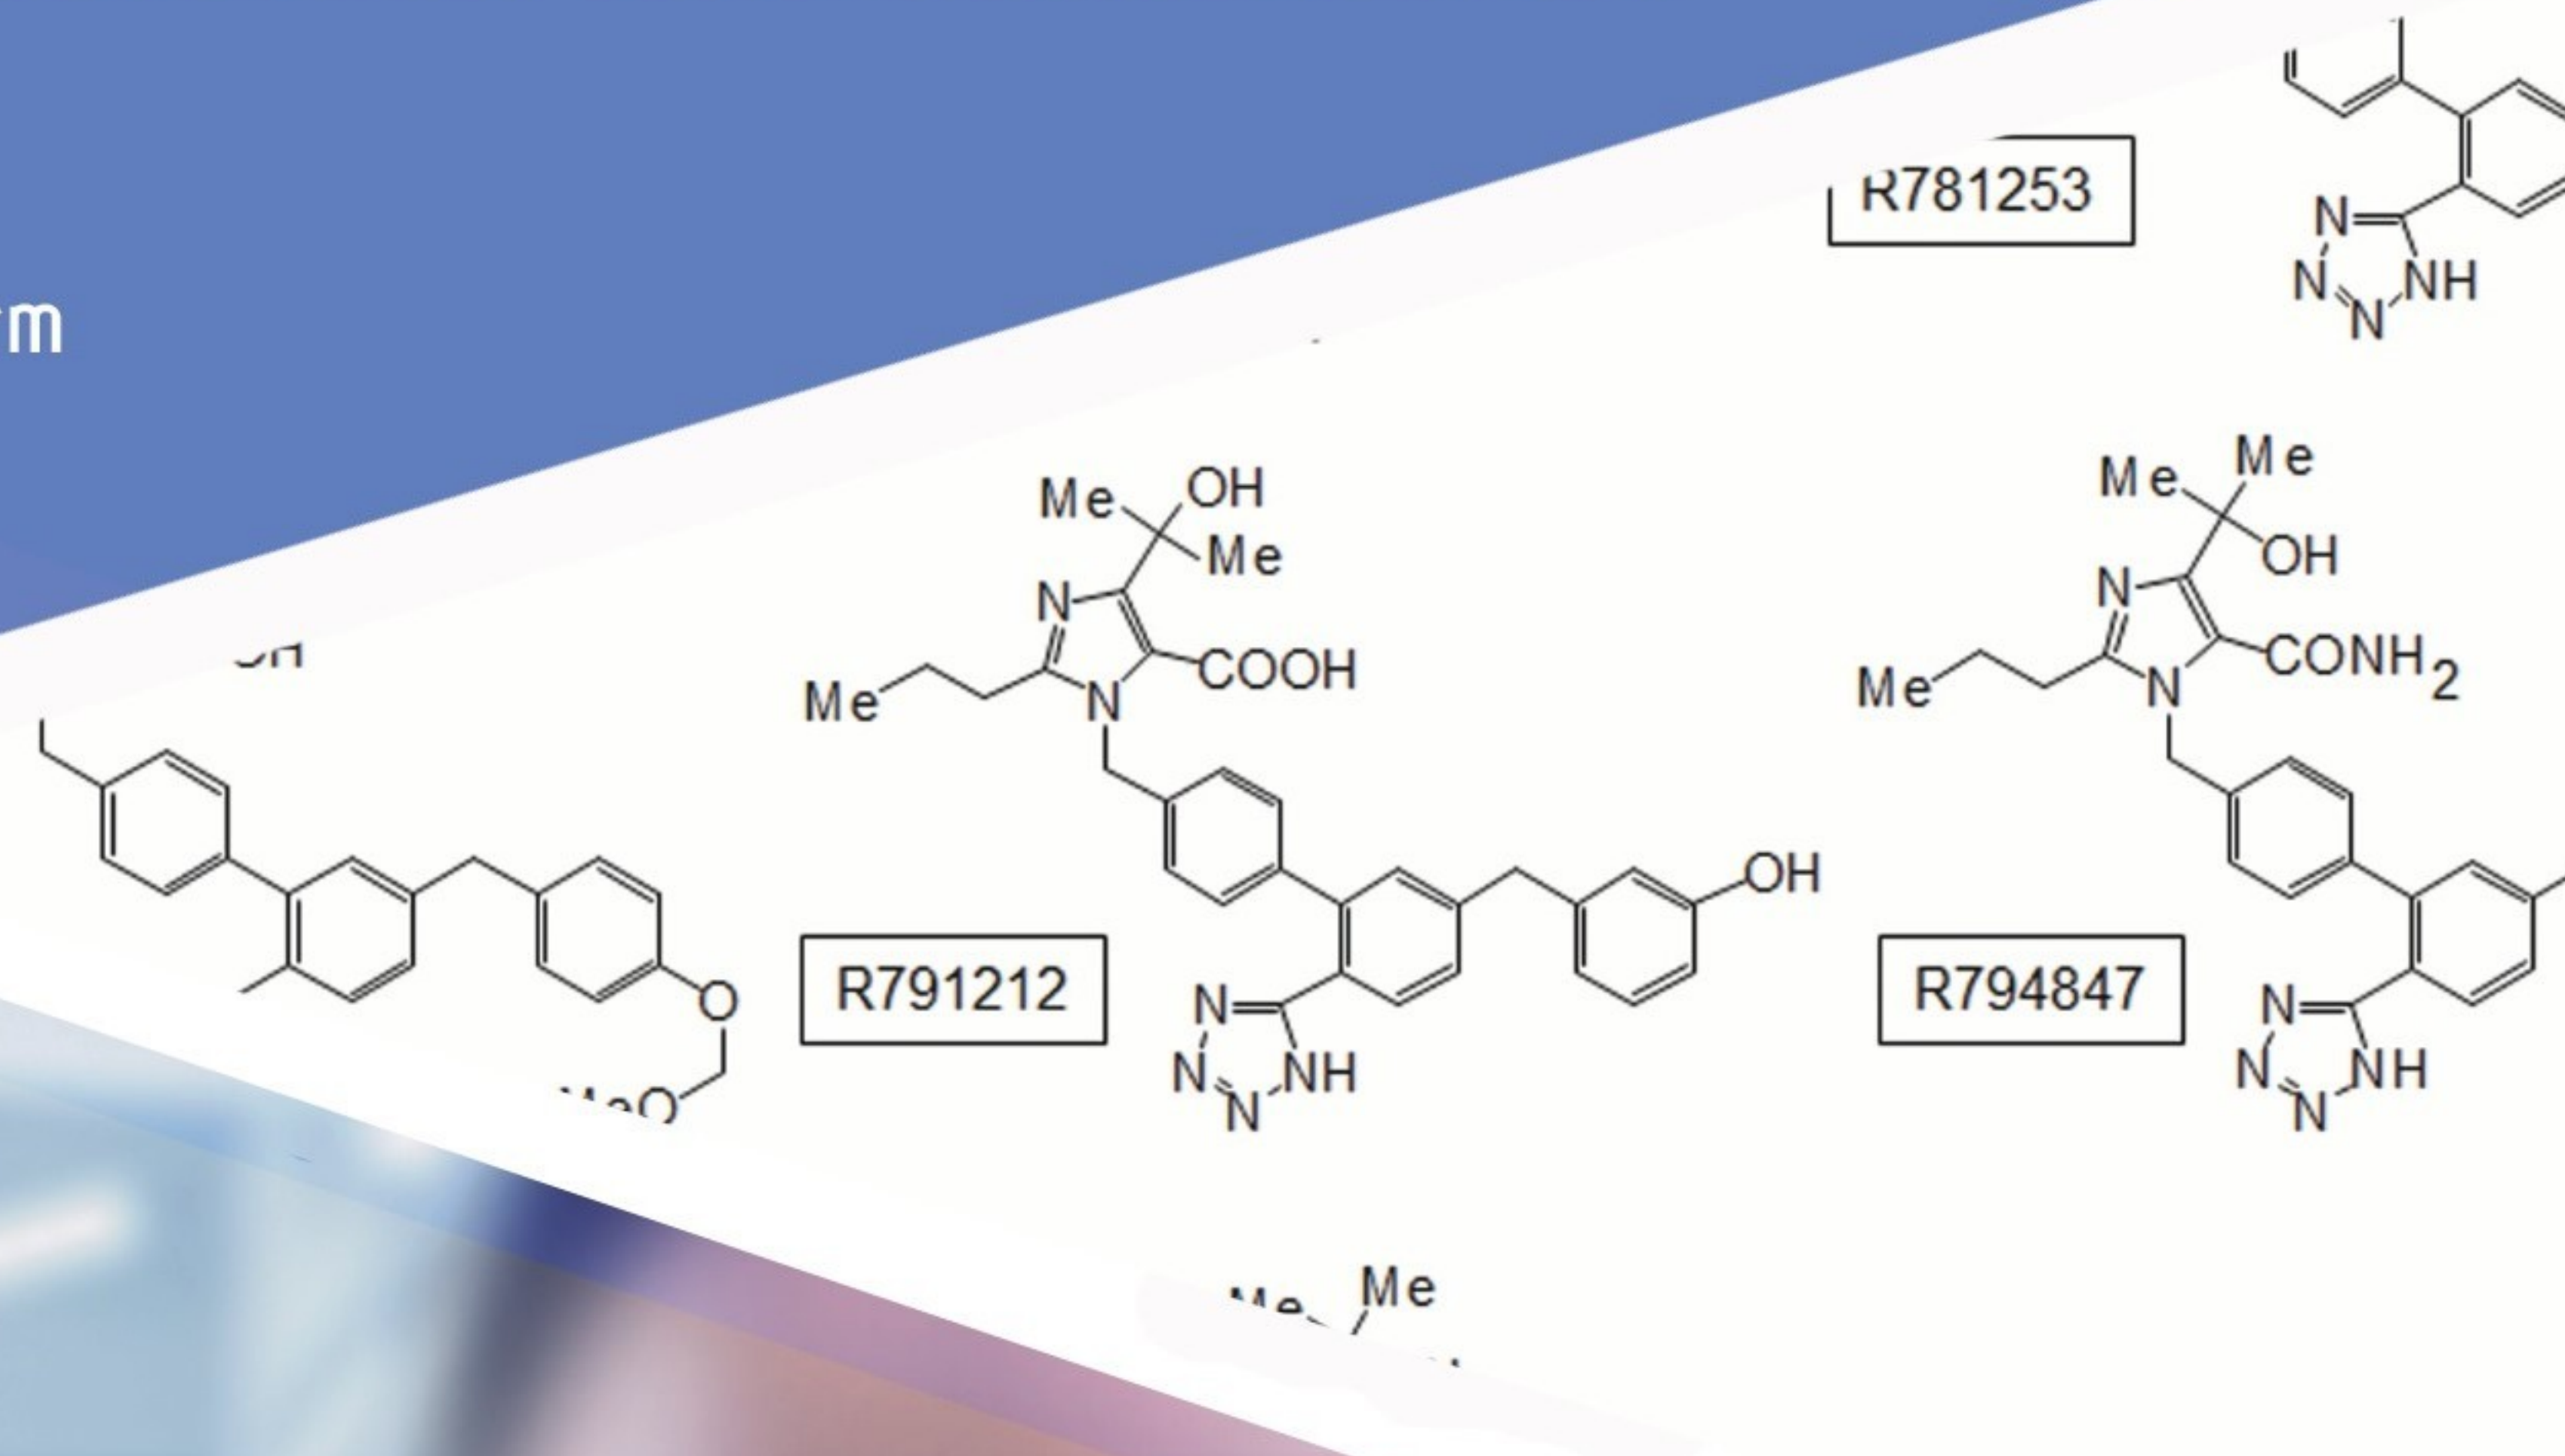

Our service team is comprised of qualified engineers who carefully study and analyze HVAC diagrams in order to determine the most suitable difuser entry point into the duct-work. This level of efficiency saves our customers money and produces the most effective results.

SERVICE & MAINTENANCE

Without a professional monthly service program, a scenting solution can easily fail. This is why NeoScent International is the most service-centric scenting company in the world. Many of our competitors have the “set it and forget it” mentality and use extremely large aroma oil reservoirs for their equipment so they can avoid monthly visits. This method often causes clogged or broken machinery, resulting in unnecessary down-time.

Our service team is fully equipped and trained to perform monthly maintenance, refills and even repairs, onsite.

ODOUR REMOVAL

NeoScent uses a patented oil formula designed to kill malodorous compounds by changing their structure at a molecular level. Once these compounds have been eliminated, our deodorant oil imparts a fresh new fragrance to the environment. This deodorant oil is dispensed using the same cold-air scenting systems as our standard aroma oils.

HOTEL AMENITIES

Hotel amenities are an easy way to stand out in your competitive set. Customization using scents, especially your signature brand aroma, can boost the guest experience while reinforcing your brand and creating lasting memories that your guests will recall for years to come.

PRODUCT SETS

- Custom Scented Candles
- Body and Hair Products
- Welcome Towel Fragrance
- Reed Diffusers
- Room Spray
- Hand Sanitizer
- Pillow Spray

HYGEINE SOLUTIONS

Since COVID-19, businesses are much more aware and proactive, concerning hygiene and sanitation. However, not all organizations are equipped to take on the responsibility of surface disinfecting and advanced hygiene control. At least not efficiently and effectively.

We have been in business for over 10 years, servicing the hospitality industry, government agencies and local businesses. We are rated #1 for our quality of service and customer satisfaction. We have the team, the tools and the experience to do the job right.
